swissgenetics 

We fulfil the dreams of cattle breeders in Switzerland and across the world of healthy and productive herds with many valuable calves. We are now seeking to strengthen our team in Mülligen.

## IVF lab technician

### You want

- ✓ to perform in-vitro fertilisation on cattle (ovum search, fertilisation, culture, embryo freezing)
- ✓ to be responsible for the maintenance, cleaning and servicing of materials and devices
- ✓ to be proactively involved in the administrative organisation of the laboratory
- ✓ to participate in quality assurance and in the further development of the IVF laboratory

### You are familiar with

- ✓ the principles of good laboratory practice
- ✓ working with biological material
- ✓ handling laboratory devices

### You enjoy

- ✓ working with precision and accuracy and complying with protocols
- ✓ adhering without exception to strict hygiene conditions
- ✓ using your good levels of German and English on a daily basis

### You are

- ✓ trained as a lab technician in the Swiss Certificate (EFZ) or as a
- ✓ veterinary or medical practice assistant (TPA/MPA) with professional laboratory experience
- ✓ the holder of a driving licence for passenger vehicles (Cat. B)
- ✓ a team player, conscientious, reliable and open to new ideas
- ✓ discreet
- ✓ accustomed to independent and precise working

### You want

- ✓ at least 5 weeks of vacation
- ✓ an employer who provides excellent social security benefits

Do you still have any questions? Then contact Dr. Iulian Ibanescu, phone +41 56 201 45 56.

We look forward to your complete application documentation. Please send it by email to: [hr@swissgenetics.ch](mailto:hr@swissgenetics.ch).
